INGREDIENT LIST
+ GLOSSARY

INGREDIENT LIST

pre-tan

BARRIER CREAM:

Deionized Water, Aloe Barbadensis, Glycerin, Stearic Acid, Isopropyl Palmitate, Glyceryl Stearate, Carthamus Tinctorius (Safflower Oil), Butyrospermum Parkii (Shea) Butter, Triethanolamine, Carbomer, Disodium EDTA, Tocopheryl Acetate, Phenoxyethanol, Ethylhexylglycerin

PH BALANCER SPRAY:

Deionized Water, Aloe Barbadensis, Witch Hazel Extract, SDA 40-B Alcohol, Glycerin, Arnica Extract, Rosemary Extract, Butylene Glycol, Capryl Glycol, Potassium Sorbate, Citric Acid, DMDM Hydantoin

SPRAY GUN CLEANING SOLUTION:

Deionized Water, SDA 40-B Alcohol, Sodium Laureth Sulfate, Cocamidopropyl Betaine, DMDM Hydantoin, D&C Blue No.1

solution

ORIGINAL N°6 LIGHT SOLUTION:

Deionized Water, Dihydroxyacetone, Aloe Barbadensis, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Ethoxydiglycol, Sorbitol, Polysorbate-20, Walnut Extract, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Caramel

ORIGINAL N°9 MEDIUM SOLUTION:

Deionized Water, Dihydroxyacetone, Aloe Barbadensis, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Ethoxydiglycol, Sorbitol, Polysorbate-20, Walnut Extract, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Caramel

ORIGINAL N°12 DARK SOLUTION:

Deionized Water, Dihydroxyacetone, Aloe Barbadensis, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Ethoxydiglycol, Sorbitol, Polysorbate-20, Walnut Extract, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Caramel

ORIGINAL N°14 DARK DEPTH SOLUTION:

Deionized Water, Dihydroxyacetone, Aloe Barbadensis, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Ethoxydiglycol, Sorbitol, Polysorbate-20, Walnut Extract, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Caramel

ORIGINAL RAPID SOLUTION:

Deionized Water, Dihydroxyacetone, Denatured Alcohol, Ethoxydiglycol, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Walnut Extract, Sorbitol, Polysorbate-20, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Caramel

LUXE N°9 MEDIUM SOLUTION:

Deionized Water, Dihydroxyacetone, Ethoxydiglycol, Caramel, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Cetyl Palmitate, Glycerin, Sorbitol, Polysorbate-20, DMDM Hydantoin, Ext Violet #2

LUXE N°12 DARK SOLUTION:

Deionized Water, Dihydroxyacetone, Ethoxydiglycol, Caramel, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Cetyl Palmitate, Glycerin, Sorbitol, Polysorbate-20, DMDM Hydantoin, Ext Violet #2

LUXE RAPID SOLUTION:

Deionized Water, Dihydroxyacetone, Ethoxydiglycol, Caramel, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Cetyl Palmitate, Glycerin, Sorbitol, Polysorbate-20, DMDM Hydantoin, Ext Violet #2

CLEAR SOLUTION:

Deionized Water, Dihydroxyacetone, Aloe Barbadensis, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Glycerin, Cetyl Palmitate, Ethoxydiglycol, Sorbitol, Polysorbate-20, Tocopheryl Acetate (Vitamin E), Retinyl Palmitate (Vitamin A), Ascorbic Acid (Vitamin C), Green Tea Scent

EDUCATION SOLUTION:

Deionized Water, Ethoxydiglycol, Caramel, Cetearyl Isononanoate, Ceteareth-20, Cetearyl Alcohol, Glyceryl Stearate, Ceteareth-12, Cetyl Palmitate, Sorbitol, Polysorbate-20, DMDM Hydantoin, D&C Green 5, D&C Red 33, FD&C Red 40, FD&C Yellow 6, FD&C Yellow 5, F&DC Blue 1

additives

DHA BOOSTER CONCENTRATE:

Deionized Water, Dihydroxyacetone

RESTORE CBD CONCENTRATE:

Cannabidiol, Deionized Water, Glycerin, Aloe Barbadensis, Potassium Sorbate, Collagen, Sodium Benzoate

SKIN FIRMING CONCENTRATE:

Deionized Water, Glycerin, Lecithin, Caffeine, Ruscus Aculeatus Root Extract, TEA-Hydroiodide, Carnitine, Butylene Glycol, Escin, Hedera Helix (Ivy) Extract, Tripeptide-1, Maltodextrin, Carrageenan, Xanthan Gum, Silica, Caprylyl Glycol, Phenoxyethanol, Potassium Sorbate, Propylene Glycol, Caprylylhydroxamic Acid, Glyceryl Caprylate

ANTI-AGING CONCENTRATE:

Deionized Water, Aloe Barbadensis, Glycerin, Propylene Glycol, Bambusa Vulgaris Extract, Butylene Glycol, Pisum Sativum Extract, Carbomer, Polysorbate 20, Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7, Niacinamide, Inositol, Caramel, Phenoxyethanol, DMDM Hydantoin, Ethylhexylglycerin

PINEAPPLE SCENT DROPS:

Deionized Water, Polysorbate 20, Fragrance

COCONUT SCENT DROPS:

Deionized Water, Polysorbate 20, Fragrance

ORANGE GINGER SCENT DROPS:

Deionized Water, Polysorbate 20, Fragrance

GOLDEN SHIMMER DROPS:

Deionized Water, Polyacrylamide, C13-14 Isoparaffin, Laureth-7, Titanium Dioxide, DMDM Hydantoin, Iron Oxide, Mica, Citric Acid, Sodium Benzoate

OPALESCENT SHIMMER DROPS:

Deionized Water, Polyacrylamide, C13-14 Isoparaffin, Laureth-7, Titanium Dioxide, DMDM Hydantoin, Iron Oxide, Mica, Citric Acid, Sodium Benzoate

retail**SUGAR SCRUB:**

Sugar, PEG-8, Glycerin, PEG-3350

EXFOLIATING BODY WASH:

Deionized Water, Aloe Barbadensis, Sodium Coco-Sulfate, Disodium Cocoamphodiacetate, Cocamido-propyl Betaine, Polyethylene, Calendula Officinalis (Calendula Extract), Carbomer, Cocamidopropyl PG-Dimonium Chloride Phosphate, Citrus Limonium (Lemon Extract), Glycereth-26, TEA-Hydroiodide, Sodium Chloride, DMDM Hydantoin, Pineapple Fragrance

BODY WASH:

Deionized Water, Aloe Barbadensis, Sodium C14-16 Olefin Sulfonate, Cocamidopropyl Betaine, Disodium Cocoamphodiacetate, Fractionated Coconut Oil, Gardenia Tahitensis Flower Extract, Oleic Acid, Panthenol (Vitamin B5), Glycol Distearate, Glycerin, Phenoxyethanol, Lavandula Angustifolia (Lavender) Oil, Ethylhexylglycerin, Aleurites Moluccana Seed (Kukui Nut) Oil, Rosa Canina Fruit (Rose Hips) Oil, Retinyl Palmitate (Vitamin A), Citric Acid, Vanilla Lavender Fragrance

BODY RENEW MOISTURIZER:

Deionized Water, Glycerin, Propylene Glycol, Behentrimonium Methosulfate, Polysorbate-60, Cetearyl Alcohol, Glyceryl Stearate SE, Carthamus Tinctorius (Safflower Seed Oil), Isopropyl Palmitate, Cyclomethicone, Glyceryl Stearate, PEG-100 Stearate, Dimethicone, Polysorbate-20, Phenoxyethanol, Mangifera Indica (Mango) Seed Butter, Sodium Hyaluronate, Butylene Glycol, Carbomer, Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7, Tocopheryl Acetate (Vitamin E), Cetyl Hydroxyethylcellulose, Ethylhexylglycerin, Mango Fragrance

TAN EXTEND LOTION:

Deionized Water, Aloe Barbadensis, Behentrimonium Methosulfate, Dimethicone, Glycerin, Cyclomethicone, Sodium PCA, Polysorbate 60, Cetearyl Alcohol, Aleurites Moluccana Seed (Kukui Nut) Oil, Jojoba Oil, Isopropyl Palmitate, Cucumber Extract, Rooibos Tea Extract, Green Leaf Extract, Citric Acid, Dihydroxyacetone, Collagen, Glucosamine, Hydro Creatine, Copper Gluconate, Pyridoxine HCL, Niacinamide, Tocopheryl Acetate (Vitamin E), Helianthus Annuus (Sunflower Seed Oil), Grape Seed Extract, Fennel Seed Extract, White Birch Extract, Red Algae, Adenosine Triphosphate, Proflavine HCL, Superoxide Dismutase, Caffeine Extract, Yeast Extract, Dextran, Acetyl Hexapeptide, Ectoin, Phenoxyethanol, Hexylene Glycol, Ethylhexylglycerin, Pineapple Fragrance

BRONZING MOUSSE:

Deionized Water, Dihydroxyacetone, Ethoxydiglycol, Glycerin, Caramel, Cocamidopropyl Betaine, Propylene Glycol, Sodium Lauroamphoacetate, Caprylyl/Capryl Glucoside, Phenoxyethanol, Ethylhexylglycerin, Argania Spinosa Oil (Argan Oil), Peg-40 Hydrogenated Castor Oil, Tocopheryl Acetate (Vitamin E), Sodium Citrate, Sodium Metabisulfite, Floral Fragrance, Cetyl Hydroxyethylcellulose, Ci 14700 (Red 4), Ci 19140 (Yellow 5), Ci 42090 (Blue 1)

INGREDIENT GLOSSARY

This glossary provides general information about the potential functions of these ingredients. The specific function and concentration of each ingredient in a product may vary, and it's advisable to consult the product label or the manufacturer for precise details.

A

Acetyl Hexapeptide: A peptide compound used in skin care products for its potential anti-aging properties, believed to help reduce the appearance of wrinkles and fine lines.

Adenosine Triphosphate: Known as ATP, it is a molecule that provides energy to cells and is sometimes included in skincare products for its potential to boost cellular energy and improve skin function.

Aleurites Moluccana Seed (Kukui Nut) Oil: Extracted from the kukui nut tree, this oil is rich in essential fatty acids and antioxidants, offering moisturizing and nourishing properties for the skin.

Aloe Barbadensis: Commonly known as aloe vera, it has soothing, hydrating, and anti-inflammatory properties, making it beneficial for calming and moisturizing the skin.

Argania Spinosa Oil (Argan Oil): A nourishing oil derived from the kernels of the argan tree, rich in vitamin E, fatty acids, and antioxidants, known for its moisturizing and skin-repairing properties.

Arnica Extract: Derived from the Arnica Montana plant, it is often used for its anti-inflammatory properties and may help reduce swelling and bruising.

Ascorbic Acid (Vitamin C): A potent antioxidant that helps brighten the skin, even out skin tone, and protect against environmental damage, commonly used in skincare products for its anti-aging and brightening effects.

B

Bambusa Vulgaris Extract: Derived from bamboo plants, are known for their moisturizing properties, helping to hydrate the skin and maintain its suppleness.

Behentrimonium Methosulfate: A conditioning agent often used in hair and skin care products for its detangling and softening properties.

Butylene Glycol: A lightweight moisturizing agent commonly used in skincare products to help improve the texture and spread ability of formulations.

Butyrospermum Parkii (Shea) Butter: A rich butter extracted from the shea tree nuts, it is highly moisturizing and nourishing, making it ideal for dry or damaged skin.

C

Caffeine: Known for its stimulating properties, caffeine is often included in skincare products for its potential to reduce puffiness, improve circulation, and temporarily tighten the skin.

Calendula Officinalis (Calendula Extract): Derived from the marigold flower, calendula extract has anti-inflammatory and soothing properties, making it beneficial for sensitive or irritated skin.

Capryl Glycol: A moisturizing agent and skin conditioning agent commonly used in skincare formulations for its hydrating properties and ability to increase the efficacy of preservatives.

Caprylylhydroxamic Acid: A gentle preservative derived from coconut oil, used in skincare products to prevent microbial growth, and extend shelf life.

Caprylyl/Capryl Glucoside: A mild surfactant derived from coconut oil and glucose, used in skincare products as a cleansing agent and to improve product texture.

Carbomer: A thickening agent and stabilizer used in skincare formulations to create a gel-like consistency and improve product texture.

Carthamus Tinctorius (Safflower Seed Oil): Extracted from safflower seeds, this oil is lightweight and high in linoleic acid, making it suitable for moisturizing and protecting the skin's barrier.

Caramel: Used primarily as a coloring agent in skincare and tanning products to provide a natural-looking tan or tint.

Carageenan: Derived from red seaweed, carageenan is used as a thickening agent and stabilizer in skincare products to improve texture and consistency.

Ceteareth-12: An emulsifying agent used in skincare formulations to create stable emulsions and improve the texture of creams and lotions.

Ceteareth-20: A surfactant and emulsifying agent used in skincare products to improve the spreadability of formulations and help ingredients mix together.

Cetearyl Alcohol: A fatty alcohol derived from coconut oil, often used in skin care products as an emollient, emulsifier, and thickener to soften and condition the skin.

Cetearyl Isononanoate: A conditioning agent and emollient used in skincare formulations to soften and smooth the skin.

Cetyl Hydroxyethylcellulose: A thickening agent derived from cellulose used in skin care products to improve texture and provide a smooth, gel-like consistency.

Cetyl Palmitate: An emollient and skin conditioning agent derived from palm oil, used in skincare products to soften and smooth the skin.

Ci 14700 (Red 4): A synthetic colorant used in skincare and cosmetic products to provide a red or pink color.

Ci 19140 (Yellow 5): A synthetic colorant used in skincare and cosmetic products to provide a yellow color.

Ci 42090 (Blue 1): A synthetic colorant used in skincare and cosmetic products to provide a blue color.

Cocos Nucifera (Coconut) Oil: Derived from coconuts, this oil is rich in fatty acids and antioxidants, providing moisturizing and nourishing properties for the skin.

Collagen: A protein found in the skin that helps maintain its structure and elasticity, often used in skincare products for its potential to improve skin firmness and elasticity.

Copper Gluconate: Serves as an antioxidant, promoting collagen production to improve skin elasticity and reduce signs of aging.

Cyclomethicone: A type of silicone used in skincare products as a lightweight emollient and solvent, providing a smooth and silky texture without feeling greasy.

D

D&C Blue No.1: A synthetic colorant used in skincare and cosmetic products to provide a blue color.

D&C Green 5: A synthetic colorant used in skincare and cosmetic products to provide a green color.

D&C Red 33: A synthetic colorant used in skincare and cosmetic products to provide a red color.

D&C Red 40: A synthetic colorant used in skincare and cosmetic products to provide a red color.

Deionized Water: Water that has been purified to remove ions and impurities, commonly used as a solvent and base ingredient in skincare formulations.

Dextran: A polysaccharide often used in skincare products for its hydrating and skin-soothing properties.

DHA (Dihydroxyacetone): A colorless sugar derived from plants, used in skincare and tanning products to provide a temporary bronzing effect by reacting with amino acids in the skin's surface layer.

Dimethicone: A type of silicone used in skincare products as an emollient and skin protectant to provide a smooth and moisturizing barrier on the skin's surface.

Disodium Cocoamphodiacetate: A mild surfactant derived from coconut oil used in skincare products as a cleansing agent and to improve product texture.

Disodium EDTA: A chelating agent used in skin care products to improve stability and prevent discoloration by binding to metal ions.

DMDM Hydantoin: A preservative used in skincare products to prevent microbial growth and extend shelf life.

E

Ethoxydiglycol: A solvent and humectant commonly used in skincare products to improve the penetration of other ingredients and provide hydration.

Ethylhexylglycerin: A conditioning agent and preservative used in skincare products to prevent microbial growth and extend shelf life, often used as an alternative to parabens.

Ext Violet #2: A synthetic colorant used in skincare and cosmetic products to provide a violet color.

F

F&DC Blue 1: A synthetic colorant used in skincare and cosmetic products to provide a blue color.

FD&C Red 40: A synthetic colorant used in skincare and cosmetic products to provide a red color.

FD&C Yellow 5: A synthetic colorant used in skincare and cosmetic products to provide a yellow color.

FD&C Yellow 6: A synthetic colorant used in skincare and cosmetic products to provide a yellow color.

Floral Fragrance: A fragrance blend inspired by floral notes, commonly used in skincare and cosmetic products for its pleasant scent.

Fractionated Coconut Oil: A type of coconut oil that has been processed to remove long-chain fatty acids, leaving behind only the medium-chain fatty acids, making it lightweight and non-greasy for skincare formulations.

Fragrance: A blend of aromatic compounds used in skincare and cosmetic products to provide a pleasant scent.

G

Gardenia Tahitensis Flower Extract: Derived from the Tahitian gardenia flower, this extract is often used in skincare products for its moisturizing and antioxidant properties.

Glycereth-26: A humectant and skin conditioning agent used in skincare products to provide hydration and improve the texture of formulations.

Glycerin: A humectant that draws moisture into the skin, helping to hydrate and maintain skin barrier function.

Glyceryl Caprylate: A skin conditioning agent and emollient derived from coconut oil, used in skincare products to soften and smooth the skin.

Glyceryl Stearate: An emollient and emulsifying agent derived from vegetable sources, used in skincare products to soften and smooth the skin and improve product texture.

Glyceryl Stearate SE: An emulsifier and emollient derived from vegetable sources, used in skin care products to stabilize formulations and improve texture.

Glycol Distearate: A conditioning agent and emollient used in skincare products to soften and smooth the skin.

Glycolic Acid: An alpha hydroxy acid (AHA) derived from sugar cane, used in skin care products for its exfoliating properties to help improve skin texture and tone.

Grape Seed Extract: Rich in antioxidants, grape seed extract is used in skincare products for its potential to protect against free radical damage and promote skin health.

Green Leaf Extract: Derived from green leaves, this extract is rich in antioxidants and vitamins and is used in skincare products for its potential to protect against environmental damage and soothe the skin.

H

Hedera Helix (Ivy) Extract: Extracted from the ivy plant, this ingredient is used in skincare products for its potential to soothe and condition the skin.

Helianthus Annuus (Sunflower Seed Oil): Extracted from sunflower seeds, this oil is rich in vitamins and fatty acids, providing moisturizing and antioxidant properties for the skin.

Hexylene Glycol: A solvent and conditioning agent used in skincare products to improve product texture and provide hydration.

Hydro Creatine: A derivative of creatine, hydro creatine is used in skincare products for its potential to improve skin hydration and firmness.

I
Inositol: Acts as a moisturizer and helps maintain healthy skin barrier function, soothing the skin and potentially reducing inflammation.

Isopropyl Palmitate: A palm oil-derived emollient used in skincare products to soften and smooth the skin.

J

Jojoba Oil: Derived from the seeds of the jojoba plant, this oil closely resembles the skin's natural sebum, making it suitable for moisturizing and balancing all skin types.

L

Laureth-7: A surfactant and emulsifying agent used in skincare products to improve product texture and help ingredients mix together.

Lecithin: A natural emollient and antioxidant derived from soybeans, used in skincare products to soften, and smooth the skin and help maintain the integrity of cell membranes.

M

Magnesium Aluminum Silicate: A naturally occurring mineral derived from clay, used in skincare products as a thickening agent and to improve texture.

Magnesium Sulfate: Commonly known as Epsom salt, it is used in skincare products for its potential to soothe sore muscles and improve circulation when used in baths.

Maltodextrin: A polysaccharide derived from starch, used in skincare products as a thickening agent and to improve product texture.

Mangifera Indica (Mango) Seed Butter: A rich butter extracted from mango seeds, it is highly moisturizing and nourishing, making it suitable for dry or damaged skin.

Mica: A naturally occurring mineral often used in skincare and cosmetic products as a pigment to provide shimmer and sparkle.

N

Niacinamide: Also known as vitamin B3, niacinamide is used in skincare products for its potential to improve skin texture, reduce inflammation, and brighten the complexion.

O

Oleic Acid: A fatty acid found in various plant oils, including olive oil, known for its moisturizing and nourishing properties for the skin.

P

Palmitoyl Tetrapeptide-7: A peptide compound used in skin care products for its potential anti-aging properties, believed to help reduce inflammation and improve skin firmness.

Palmitoyl Tripeptide-1: A peptide compound used in skin care products for its potential anti-aging properties, believed to help stimulate collagen production and improve skin elasticity.

Panthenol (Vitamin B5): Known for its moisturizing properties, panthenol is used in skincare products to hydrate and soothe the skin, and improve skin barrier function.

Peg-40 Hydrogenated Castor Oil: A surfactant and emulsifying agent used in skincare products to improve product texture and help ingredients mix together.

Peg-8: A humectant and solvent used in skincare products to provide hydration and improve the penetration of other ingredients.

Peg-3350: A humectant and conditioning agent used in skincare products to provide hydration and improve the texture of formulations.

Phenoxyethanol: A preservative used in skincare products to prevent microbial growth and extend shelf life.

Pisum Sativum Extract: Derived from peas, this extract is rich in antioxidants and vitamins and is used in skincare products for its potential to protect against environmental damage and promote skin health.

Polysorbate 20: A surfactant and emulsifier used in skincare products to improve the spreadability of formulations and help ingredients mix together.

Polysorbate-20: A surfactant and emulsifier used in skincare products to improve product texture and help ingredients mix together.

Potassium Sorbate: A preservative used in skincare products to prevent microbial growth and extend shelf life.

Propylene Glycol: A humectant and solvent commonly used in skincare products to provide hydration and improve the penetration of other ingredients.

Pyridoxine HCL: Also known as vitamin B6, pyridoxine HCL is used in skincare products for its potential to improve skin hydration and reduce inflammation

R

Red Algae: Rich in antioxidants and minerals, red algae extract is used in skincare products for its potential to hydrate, protect against environmental damage, and promote skin health.

Retinyl Palmitate (Vitamin A): A derivative of vitamin A, retinyl palmitate is used in skincare products for its potential to improve skin texture, reduce the appearance of wrinkles, and promote collagen production.

Rosemary Extract: A botanical extract known for its antioxidant and antimicrobial properties, used in skin care products for its potential to protect against free radical damage and soothe the skin.

Ruscus Aculeatus Root Extract: Derived from the butcher's broom plant, this extract is used in skincare products for its potential to improve circulation and reduce the appearance of dark circles and puffiness.

S

Silica: A mineral often used in skincare products as a thickening agent, absorbent, and to improve product texture.

Sodium Benzoate: A preservative used in skincare products to prevent microbial growth and extend shelf life.

Sodium C14-16 Olefin Sulfonate: A surfactant and cleansing agent used in skincare products to remove dirt, oil, and impurities from the skin.

Sodium Chloride: Commonly known as table salt, it is used in skincare products as a thickening agent and to improve texture.

Sodium Citrate: A buffering agent and pH adjuster used in skincare products to maintain product stability and balance pH levels.

Sodium Hyaluronate: The salt form of hyaluronic acid, used in skincare products for its ability to hydrate and plump the skin by attracting and retaining moisture.

Sodium Lauroamphoacetate: A mild surfactant derived from coconut oil used in skincare products as a cleansing agent and to improve product texture.

Sodium Metabisulfite: An antioxidant and preservative used in skincare products to prevent oxidation and extend shelf life.

Sorbitol: A humectant commonly used in skincare products to provide hydration and improve the texture of formulations.

SDA 40-B Alcohol: A solvent and carrier ingredient commonly used in skincare products to dissolve other ingredients and improve product spreadability.

Stearic Acid: A fatty acid derived from vegetable oils, used in skincare products as an emollient and emulsifier to soften and smooth the skin.

Superoxide Dismutase: An antioxidant enzyme naturally found in the body, used in skin care products for its potential to protect against oxidative stress and reduce signs of aging.

T

TEA-Hydroiodide: Often used for its conditioning properties.

Tocopheryl Acetate (Vitamin E): A form of Vitamin E with antioxidant properties.

Triethanolamine: Adjusts the pH of the product.

Tripeptide-1: A synthetic peptide that stimulates collagen production, enhancing skin firmness and elasticity while diminishing the appearance of wrinkles and fine lines.

V

Vanilla Lavender Fragrance: A fragrance blend inspired by vanilla and lavender notes, commonly used in skincare and cosmetic products for its pleasant scent.

W

Walnut Extract: Derived from walnuts, this extract is often used in skincare products for its potential exfoliating properties and ability to improve skin texture.

White Birch Extract: Derived from the bark of the white birch tree, this extract is rich in antioxidants and vitamins and is used in skincare products for its potential to brighten the skin and protect against environmental damage.

Witch Hazel Extract: Derived from the witch hazel shrub, this extract has astringent and soothing properties, making it beneficial for toning and calming the skin.

X

Xanthan Gum: A polysaccharide derived from fermentation, used in skincare products as a thickening agent and to improve texture.

Y

Yeast Extract: Rich in amino acids, peptides, and vitamins, yeast extract is used in skincare products for its potential to hydrate, brighten, and soothe the skin.
